

The background is a solid light brown color. Scattered across the surface are several dark brown, roasted coffee beans. Some are whole, while others are broken into smaller pieces. In the lower-left corner, there is a white, rectangular piece of paper that appears to be torn or folded, with a slightly irregular edge.

COFFEE SHOP DATA ANALYSIS

RECOMMENDED ANALYSIS

1. How do sales fluctuate across different days of the week and hours of the day?
2. What are the peak hours and busiest days for customer activity?
3. What is the monthly breakdown of total sales revenue?
4. How does sales performance compare across the different store locations?
5. What is the average spend and order size per customer?
6. Which products contribute the most in terms of sales volume and revenue?
7. How do sales vary by product categories and types (coffee, tea, bakery, etc.)?

INSIGHTS FROM ANALYSIS

1. Peak Hours (9–11 AM) → This confirms strong morning demand.
2. Evening Drop (after 6 PM) → Sales decline significantly in the evening.
3. Store Location Sales → Hell's Kitchen leads slightly, but all stores show balanced performance.
4. Category Sales → Coffee dominates (39%), followed by bakery (28%), while niche categories (flavors, packaged chocolates) contribute less.
5. Top Products → Barista Espresso, Brewed Chai Tea, and Hot Chocolate are best-sellers.
6. Customer Spend → Average bill/person is \$4.69, with 1.44 items/order.
7. Weekend vs Weekday → Slightly lower sales on weekends.

SUGGESTED IMPROVEMENTS

1. Introduce morning combo offers (coffee + bakery) or loyalty discounts to capture repeat customers during rush hours.
2. Launch evening specials (snack + tea deals) or happy hour pricing to attract office-goers after work.
3. Target location-specific promotions to push growth in Lower Manhattan.
4. Expand popular categories (coffee & bakery variants), while bundling low-performing items with top sellers to boost their movement.
5. Highlight these items in menus, promotions, and displays to drive even more sales.
6. Customer Spend → Average bill/person is \$4.69, with 1.44 items/order.
7. Introduce upselling strategies (add-ons like flavors, whipped cream, bakery side items) to increase average order value.
